

FIRE HOSE KITS

The standard hose kit features 1.5", MSHA approved, single polyester jacket hose with a 900 psi burst rating. The hose is lapped and velcro banded for rapid, tangle-free deployment. Also included are an NFPA approved, 100 GPM, fully adjustable nozzle and spanner wrench. The complete kit comes packaged in a durable Pelican case. Mine Lifeline offers an annual testing/exchange service as well. Call for details and pricing.

FIREPKG-500	500' HOSE KIT, NPSH THREAD
FIREPKG-250	250' HOSE KIT, NPSH THREAD
FIREPKG-500-NH	500' HOSE KIT, NST THREAD
FIREPKG-250-NH	250' HOSE KIT, NST THREAD
FIREPKG-100	100' HOSE KIT, NPSH THREAD
FIREPKG-100-NH	100' HOSE KIT, NST THREAD

INDIVIDUAL COMPONENTS

Each high quality component of the hose kit can be purchased separately. It is important that the correct thread style is ordered. Most coal mines use NPSH thread, which is commonly referred to as "pipe thread". NST thread is standard for the fire service industry. We recommend the use of an adapter at all fire outlets to obtain a proper hose connection. Adapters come standard with either male or female 1.5" NPT inlet. Outlets are 1.5" male with protective cap in either NPSH or NST thread.

3147	SPANNER WRENCH, FITS UP TO 2.5"

ADAPTERS

These anodized aluminum adapters are CNC machined. The attached protective cap keeps the threads clean and free from damage. Available with either male or female inlets in 1.5" NPT. The male outlet can be ordered in either NPSH or NST thread. Unlike NPT nipples, the outlets have a flat sealing edge designed for use with the gasket found in firehose fittings. Hose can be quickly installed by hand without leaks.

Part#	Description
36-15NPT15IWC	MALE-MALE OUTLET ADAPTER, 1.5" NPSH
37-15NPT15IWC	FEMALE-MALE OUTLET ADAPTER, 1.5" NPSH
36-15NPT15NSTWC	MALE-MALE OUTLET ADAPTER, 1.5" NST
37-15NPT15NSTWC	FEMALE-MALE OUTLET ADAPTER, 1.5" NST

Mine Lifeline is a stocking distributor for US Coupling. Adapters of all sizes and thread types are available. Call for details and pricing.

FOAM EQUIPMENT

Studies have shown firefighting foam to be 300 % to 400% more effective than water alone. Foam additives reduce the surface tension of water, which results in a smothering effect as well as cooling. This also allows the solution to adhere on vertical surfaces, unlike plain water. Using foam provides faster knockdown, decreased water consumption, and less likelihood of rekindling. Mine Lifeline has a complete line of foam application products.

		2131-1340-6	AER-O-LITE, 1% AFFF FOAM, 5 GALLON PAIL

This stand mounted reel/educator combo is designed for use in preparation plants. It features a 20 GPM educator, 100' semi-rigid hose, low expansion nozzle, and 10 gallons of foam concentrate. A rubber inlet hose is included to preconnect the unit to a fire outlet. The system can be fully charged and ready to go in less than 30 seconds.

Part#	Description
FOAMSTATION-100	REEL/EDUCATOR SYSTEM
FS100-COVER	FOAMSTATION-100 VINYL COVER

This skid mounted reel/educator combo is designed for use in underground mines. It features a 20 GPM educator, 100' semi-rigid hose, low expansion nozzle, and 15 gallons of foam concentrate. It can be pre-installed at belt drives or other areas of concern in the mine. The unit can also be easily transported by mobile equipment. At just over 20" tall, it will fit in any underground mine.

PERSONAL PROTECTION

Mine Lifeline is proud to be an authorized distributor and service center for Scott Safety. They are a world wide leader in personal protective equipment. Their SCBA's are backed by the best warranty in the industry and used by the majority of US fire departments. Open circuit SCBA's can be stored underground or on the surface, ready to use in case of emergency. During a fire, time is precious and rescue teams may not be able to respond for hours. Equip your fire brigade with the best...give them Scott Safety.
