

**SCSR STORAGE**

The SCSR storage cache has been completely redesigned to provide added protection and durability. This new design incorporates 360 degree foam protection for each SCSR. Dual tension latches hold the lid closed over the roughest terrain. All aluminum construction keeps weight to a minimum and will not corrode. Inject molded rings trim each pocket to form a tight seal with the foam lined lid. Caches are available in stationary and mobile configurations. The stationary version includes an SCSR branch line. The mobile version includes a mounting system.

**CSE SR-100 STORAGE**

**OCENCO EBA 6.5 STORAGE**

Part#	Description
CSE2PKC-S	2 UNIT CACHE, STATIONARY
CSE2PKC-M	2 UNIT CACHE, MOBILE
